

Lunner Produkter AS (Lunner Products Ltd) was established in 1992. The company is centrally located at Lunner, a village just 60 km outside the city of Oslo, Norway.

The company has contributed to positive communal activities as well as employing a high number of persons who suffer from disabilities and thus would face several challenges entering the labour-market, locally as well as nationwide.

Lunner Produkter AS, (LUPRO) plays an important role both to the society as well as to customers, providing quality services.

LUPRO has also played an important role facilitating apprenticeship, and also hosting students who would like to have practical training for a limited periode.

LUPRO has since 2003, been a local partner to NHO (Norway`s major employer organisation) in providing structured and relevant schemes for students practising with LUPRO.

In November 2005, LUPRO bought "PVC Duksveis" dealing with plastic sheet welding, and appointed Mr Steinar Langedahl as COO. He brought with him considerable experience in training, operations and maintenance of light industrial installations.

In May 2011 LUPRO acquired machinery, equipment and inventory from Scandinavian Water Technology (SWT) and entered a partnership with them. Today SWT is responsible for sales and LUPRO produce or procure, pack and ship various Water-, Sanitation- and Hygiene- (WASH) products.

Our corporate vision is to introduce new high quality products and good service to our global customers. LUPRO works with SWT in order to provide clean water to people in need globally. Our joint effort will cater for proper equipment for providing, storing and transportation of clean water, everywhere – always.

LUPRO produces water tanks and provides a complete clean water concept, to a single truck load containing all components ensuring clean and safe water.

The production and assembly plant at Lunner, not far from Oslo, has quick access to Oslo international airport as well as Oslo Port. We are able to ship a complete spectre of products overnight to international destinations.
